Chandeliers
CRYSTAL LIGHTING

We don't create lighting.
We shape luminous architecture.

We cultivate

Chandeliers

Various classic chandelier styles have influenced each other over the centuries, blending and recreating themselves to reflect the trends of the time. The Collections portfolio showcases our Cultivation of Chandeliers concept. This is where we use craft combined with new production methods, materials and technology to create chandeliers that enlighten spaces as beautifully as they did hundreds of years ago.

A close-up photograph of a glowing, textured glass rod being shaped on a dark metal mold. The rod is curved and has a shimmering, crystalline texture. The background is dark, and the lighting highlights the intricate details of the glass and the metallic surface of the mold.

100 crafts

From the first sketch to the mock-up to production to finishing and assembling, Our professional team ensures the highest quality and greatest attention to detail. Nearly all of our production is done by hand. Glass is in our DNA; we breathe it, sculpt it, refine and shape it
